

STRATEGIC CREDIT FUND

4Q 2019 Commentary

Summary

Corporate credit markets, led by high yield bonds and floating-rate bank loans, continued a strong 2019 by generating positive returns in the fourth quarter. Performance during the period was boosted by a phase one trade deal between the U.S. and China, modestly improved economic data and accommodative central bank policies.

Market Environment

Corporate credit benefited from strong risk sentiment in the fourth quarter, driven by easing trade tensions, slightly better-than-expected economic conditions, an additional interest rate cut by the Federal Reserve (Fed) and rising equity prices.

Price appreciation in the fourth quarter was driven by positive sentiment for both equities and corporate bonds. Modestly improved economic conditions and the avoidance of additional tariffs between the U.S. and China, as well as between the U.S. and Europe, contributed to the supportive backdrop. Additionally, central banks continued to provide support for risk assets, with the Fed cutting the Fed Funds rate in October for the third time in 2019, and both the Fed and the European Central Bank (ECB) unveiling plans to expand their balance sheets to stimulate the overnight lending market and, in turn, the economy. After ending the previous two quarters with an inverted yield curve in the U.S., the rise in 10-year Treasury yields and decline in short-term yields led to a steeper, positive yield curve in the fourth quarter. The 10-year yield rose from 1.68% at the end of September to 1.92% at the end of the year, while the 2-year yield fell from 1.63% to 1.58% and the 3-month yield fell from 1.88% to 1.55%.

Corporate credit spreads declined meaningfully in December and throughout the year, ending 2019 near multi-year lows. Defaults decreased in the fourth quarter, with a quarterly default volume of \$13.7 billion (bonds and loans) compared to \$16.0 billion in the third quarter. We believe the overall default environment continues to be benign with current default rates well below long-term averages. Additionally, net supply in the high yield market remains low, which should provide support to the corporate credit market.

The strong risk-on environment to end the year, along with the inherent interest rate sensitivity of investment grade corporates (in an environment where intermediate and longer-term rates increased) led to the sector's underperformance relative to high yield bonds and bank loans. High yield bonds, as measured by the FTSE BB/B Excluding B/CCC Splits Index, performed the strongest in the quarter with a return of 2.48%; bank loans, as measured by the Credit Suisse Leveraged Loan Index, returned 1.68%; and investment grade corporates, as measured by the Bloomberg Barclays U.S. Corporate Investment Grade Index, returned 1.18% in the fourth quarter.

Performance and Attribution Summary

The Aristotle Strategic Credit Fund (ARSSX) returned 1.27% at NAV in the fourth quarter, underperforming the 1.77% return of its blended benchmark of one-third Bloomberg Barclays U.S. High Yield Ba/B 2% Issuer Cap Index, one-third Bloomberg Barclays U.S. Intermediate Corporate Index and one-third Credit Suisse Leveraged Loan Index. Relative performance was driven primarily by security selection, sector rotation and industry allocation.

Security selection was the largest detractor to relative performance, driven by negative selection within the Telecommunications and Gaming industries. This was partially offset by positive security selection within the REITs & Real Estate Related and Insurance industries.

Sector rotation also detracted, driven by an earlier change in allocation from bank loans to investment grade corporates. A residual allocation to cash also held back performance relative to the blended benchmark. Finally, industry allocation was another detractor during the fourth quarter, driven by the Fund's underweight in Retailers & Restaurants (specifically within high yield), which was partially offset by a positive underweight to Industrials.

Outlook and Strategy

We believe accommodative central bank policies, reaccelerating earnings growth and continued demand for assets with yield should support corporate credit markets in 2020; however, given the low current level of corporate bond yields and strong performance in 2019, we believe investors are set to experience a more coupon-like return environment in 2020.

We believe that sluggish global economic growth, tame inflation, accommodative central bank policies, and negative risk-free rates overseas will provide a strong bid to U.S. risk-free assets; and that a

still healthy U.S. economy, albeit growing at a more moderate pace, should continue to support the corporate credit market. Despite expectations of a more benign macro environment compared to the end of 2018/beginning of 2019, policy risk around trade negotiations, uncertainty regarding the U.S. presidential election and corporate bond and loan spreads near multi-year lows may limit price appreciation in 2020.

In our view, higher quality corporate credit will likely see spreads relatively range-bound, also, due to a modestly supportive U.S. economic backdrop, the strong global bid for yield, and fair valuations. In addition, we believe equity and bond investors will continue to favor companies with more modest or declining leverage, providing further support for valuations. In terms of performance, we expect higher quality corporate credit to give investors a “coupon-like” return throughout the year, following the strong performance of 2019. Lastly, we remain cautious on the more speculative and distressed segments of the market and believe that low relative yields in this area of the market do not compensate investors for the additional risks.

Strategic Credit Positioning

The Fund remains overweight in investment grade corporates and high yield bonds, with an underweight to floating-rate bank loans. Over the last year, we have shifted exposure from bank loans to investment grade corporates.

As of December 31, 2019, the Fund was composed of 45.1% investment grade corporates, 37.7% high yield bonds and 12.5% bank loans, with the balance in cash. The shift from bank loans to investment grade bonds has been based on the current interest rate environment and concerns regarding deteriorating fundamentals and covenants within the bank loan market.

The Fund’s significant active exposures at quarter-end included overweights in the Insurance, REITs and Real Estate Related, Telecommunications and Finance Companies industries and underweights in the Banking, Technology, Media Entertainment and Energy industries.

Performance data quoted here represents past performance. Past performance is no guarantee of future results. Returns over one year are annualized. Investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted. To obtain current performance information to the most recent month-end, please call (844) 274-7868.

The Fund’s advisor has contractually agreed to waive certain fees and/or absorb expenses, through April 30, 2020, to the extent that the total annual operating expenses do not exceed 0.62% of average daily net assets of the Fund. The Fund’s advisor may seek reimbursement from the Fund for waived fees and/or expenses paid for three years from the date of the waiver or payment. Without these reductions, the Fund’s performance would have been lower. A redemption fee of 1.00% will be imposed on redemptions of shares within 30 days of purchase.

**The blended benchmark represents a blend of 1/3 Bloomberg Barclays U.S. High Yield Ba/B 2% Issuer Cap Index, 1/3 Bloomberg Barclays U.S. Intermediate Corporate Index and 1/3 Credit Suisse Leveraged Loan Index. The Bloomberg Barclays U.S. High Yield Loans Index was retired on September 30, 2016 and was replaced with the Credit Suisse Leveraged Loan Index effective October 1, 2016.*

An investment in the Fund is subject to risks and you could lose money on your investment in the Fund. The principal risks of investing in the Fund include, but are not limited to, investing in fixed income securities, high yield bonds, bank loans, foreign securities and emerging markets.

The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. High yield bonds are debt securities rated below investment grade (often called "junk bonds"). Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. The Strategic Credit Fund's investments in assignments of bank loans may create substantial risk. Although the Strategic Credit Fund expects it will invest in senior and secured bank loans, the Fund may invest in unsecured or subordinated loans. In addition, the Fund may invest in secured and unsecured participations in bank loans. These bank loans will generally be rated below investment grade. Foreign securities have additional risks including currency rate changes, political and economic instability, lack of comprehensive company information, less market liquidity, less efficient trading markets, and differing auditing controls and legal standards. Investments in emerging markets involve even greater risks.

Credit quality ratings are sourced from Standard & Poor's (the "S&P"), Moody's and Fitch's. Ratings values are based on the higher of either S&P, Moody's or Fitch's. If none of the rating agencies have assigned a rating the Fund will assign a rating of NR (non-rated security). The ratings represent their (S&P, Moody's, Fitch's) opinions as to the quality of the securities they rate. The ratings from AAA (S&P, Fitch's) or Aaa (Moody's) (extremely strong capacity to meet its financial commitment) to D (S&P, Fitch's) or C (Moody's) (in default). Ratings are relative and subjective and are not absolute standards of quality. The ratings provided relate to the underlying securities within the fund and not the fund itself.

Definitions:

- The Fund is benchmarked to a blend of three indices: 1/3 Bloomberg Barclays U.S. High Yield Ba/B 2% Issuer Cap Index, 1/3 Bloomberg Barclays U.S. Intermediate Corporate Index and 1/3 Credit Suisse Leveraged Loan Index. The Bloomberg Barclays U.S. High Yield Loans Index was retired on September 30, 2016 and was replaced with the Credit Suisse Leveraged Loan Index effective October 1, 2016.
- The Bloomberg Barclays U.S. High Yield Ba/B 2% Issuer Cap Index is an issuer-constrained version of the U.S. Corporate High-Yield Index that measures the market of U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bonds rated Ba/B. The Index limits the maximum exposure to any one issuer to 2%.
- The Bloomberg Barclays U.S. Intermediate Corporate Index is designed to measure the performance of U.S. corporate bonds that have a maturity of greater than or equal to 1 year and less than 10 years. The Index includes investment grade, fixed-rate, taxable, U.S. dollar denominated debt with \$250 million or more par amount outstanding, issued by U.S. and non-U.S. industrial, utility and financial institutions.
- The Credit Suisse Leveraged Loan Index is designed to mirror the investable universe of the U.S. dollar-denominated leveraged loan market.
- The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index of domestic investment grade bonds, including corporate, government and mortgage-backed securities.
- The Bloomberg Barclays U.S. Corporate Investment Grade Index measures the performance of investment grade corporate bonds that are U.S. dollar-denominated and have a remaining maturity of greater than one year.
- The FTSE BB/B Excluding B/CCC Splits Index is a high yield market index, which includes BB-rated and B-rated bonds. This is a sub-index of the U.S. High Yield Market Index excluding bonds rated B/CCC and below.
- Treasuries are negotiable debt obligations of the U.S. government secured by its full faith and credit and issued at various schedules and maturities.

The volatility (beta) of the Fund may be greater or less than the benchmarks. It is not possible to invest directly in these indices.

Fund composition will change due to ongoing management of the Fund. References to specific securities or sectors should not be construed as recommendations by the Fund, its Advisor or Distributor.

As of December 31, 2019, the ten largest holdings in the Fund and their weight as a percent of total net assets were: CSC Holdings, LLC September 2019 Initial Term Loan, 2.33%; Penn National Gaming, Inc. Term A Facility Refinancing Loan, 2.14%; Astro AB Borrower, Inc. Tranche B Term Loan (First Lien), 2.09%; Prudential Financial Inc, 1.93%; Brookfield Finance Inc, 1.81%; Anheuser-Busch InBev Worldwide Inc, 1.65%; Dominion Energy Inc, 1.59%; Ally Financial Inc, 1.50%; Southern California Edison Co, 1.50%; Goldman Sachs Group Inc, 1.49%.
